EDUCATION

VIT Bhopal University, Bhopal, MP

Sep 2022 – Sep 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.19

Delhi Public School

2021

Class XII (Senior Secondary)

Aggregate: 83%

Delhi Public School

2019

Class X (Secondary)

Aggregate: 83%

TECHNICAL SKILLS

Bash Scripting, AWS CLI, Terraform, AWS (EC2, RDS, S3, Beanstalk, ElastiCache, MQ, DynamoDB), Docker, CI/CD, Ansible, CloudFormation, msmtplib, Crontab, Git, Linux

EXPERIENCE

Data Science Intern

Jan 2025 – Jul 2025

Finlatics (Remote)

- Led exploratory data analysis and feature engineering on large banking datasets to identify attributes influencing term deposit subscriptions.
- Created visualizations in Matplotlib and Seaborn to reveal customer behavioral trends and product preferences.
- Applied correlation analysis and hypothesis testing to build accurate predictive models increasing campaign effectiveness by 15%.

PROJECTS

vProfile Re-architecting with PaaS/SaaS | *Beanstalk, RDS, ElastiCache, MQ*

2026

- Migrated multi-tier application from IaaS to PaaS/SaaS architecture, eliminating manual infrastructure management and reducing operational overhead.
- Provisioned managed RDS PostgreSQL with automated backups and read replicas; optimized ElastiCache Redis for session storage, reducing API latency by 40%.
- Configured Amazon MQ for asynchronous message queuing; deployed on Elastic Beanstalk with auto-scaling achieving 99.9% availability.

Terraform AWS EC2 with Remote State | *Terraform, AWS S3, DynamoDB, EC2*

2026

- Built Infrastructure-as-Code module using Terraform to provision AWS EC2 instances with S3 remote backend for state management.
- Configured DynamoDB table for state locking to prevent concurrent modifications; defined reusable variables and outputs for instance details (ID, public/private IPs).
- Implemented backend configuration management and state file encryption, enabling safe collaborative infrastructure deployments and version control.

AWS Resource Tracker | *Bash Script, AWS CLI, msmtplib, Linux Crontab*

2026

- Developed bash script to automatically track AWS resources (S3, EC2, Lambda, IAM Users) across multiple regions and generate daily reports.
- Configured msmtplib with Gmail SMTP to email resource reports as attachments; automated scheduling using Linux cronjob at 15:30 IST.
- Deployed on AWS EC2 Ubuntu (ap-south-1); improved resource visibility and enabled proactive tracking of cloud infrastructure.

CERTIFICATIONS

- **Cloud Computing** – NPTEL (cloud infrastructure, virtualization, services deployment).
- **Certified Cloud Practitioner** – AWS (cloud infrastructure, Kubernetes, ECR, ECS, Beanstalk).
